Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed Percentage Buffered Downside Principal at Risk Securities Linked to the EURO STOXX 50® Index Due January 7, 2019

n Linked to the EURO STOXX 50® Index (ticker symbol: SX5E) (the “underlying index”)

n Unlike ordinary debt securities, the securities do not pay interest or repay a fixed amount of principal at maturity. Instead, the securities provide for a payment at maturity that may be greater than, equal to or less than the stated principal amount of the securities, depending on the performance of the underlying index from its initial index level to its final index level, subject to the maximum return at maturity. The payment at maturity will reflect the following terms:

n If the level of the underlying index increases, you will receive the stated principal amount plus 175% participation in the upside performance of the underlying index, subject to a maximum return at maturity of 40.00% of the stated principal amount

n If the level of the underlying index decreases, but the decrease is not more than 20%, you will be repaid the stated principal amount

n If the level of the underlying index decreases by more than 20%, you will receive less than the stated principal amount and have 1-to-1 downside exposure to the decrease in the level of the underlying index in excess of 20%

n Investors may lose up to 80% of the stated principal amount

n All payments on the securities are subject to the credit risk of Citigroup Inc.

n No periodic interest payments or dividends

n The securities will not be listed on any securities exchange and, accordingly, may have limited or no liquidity. You should not invest in the securities unless you are willing to hold them to maturity.

Investing in the securities involves risks not associated with an investment in conventional debt securities. See “Risk Considerations” beginning on page PS-7 and “Risk Factors Relating to the Securities” beginning on page EA-6 of the accompanying product supplement.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the securities or determined that this pricing supplement or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the

contrary is a criminal offense.

The securities are unsecured senior debt obligations of Citigroup Inc. All payments due on the securities are subject to the credit risk of Citigroup Inc. The securities will not be guaranteed by any affiliate of Citigroup Inc. None of Wells Fargo Securities, LLC (“Wells Fargo”) or any of its affiliates will have any liability to the purchasers of the securities in the event Citigroup Inc. defaults on the securities. The securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

	Per Security	Total
Public Offering Price(1)	\$1,000.00	\$12,717,000.00
Maximum Underwriting Discount and Commission(2)	\$27.40	\$348,445.80
Proceeds to Citigroup Inc.(2)	\$972.60	\$12,368,554.20

(1) On the date of this pricing supplement, the estimated value of the securities is \$960.60 per security, which is less than the public offering price. The estimated value of the securities is based on Citigroup Global Market Inc.’s (“CGMI”) proprietary pricing models and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See “Valuation of the Securities” in this pricing supplement.

(2) CGMI, an affiliate of Citigroup Inc., as the lead agent for the offering, has agreed to sell the securities to Wells Fargo, as agent. Wells Fargo will receive an underwriting discount and commission of 2.74% (\$27.40) for each security it sells. Wells Fargo will pay selected dealers, which may include Wells Fargo Advisors, LLC (“WFA”) and Wells Fargo Advisors Financial Network, LLC, a fixed selling commission of 1.25% (\$12.50) for each security they sell. In addition to the selling commission allowed to WFA, Wells Fargo will pay \$0.75 per security of the underwriting discount and commission to WFA as a distribution expense fee for each security sold by WFA. See “Supplemental Plan of Distribution” on page PS-18 of this pricing supplement and “Use of Proceeds and Hedging” in the accompanying prospectus for further information regarding how we have hedged our obligations under the securities.

Wells Fargo Securities

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

Investment Description

The Principal at Risk Securities Linked to the EURO STOXX 50® Index Due January 7, 2019 are unsecured senior debt securities issued by Citigroup Inc. Unlike conventional debt securities, the securities do not pay interest and do not repay a fixed amount of principal at maturity. Instead, the securities offer a payment at maturity that may be greater than, equal to or less than the stated principal amount of the securities depending on the performance of the underlying index from its initial index level to its final index level, subject to the maximum return at maturity. The securities provide:

- (i) the possibility of a leveraged return at maturity if the level of the underlying index increases from its initial index level to its final index level, provided that the total return at maturity of the securities will not exceed the maximum return of 40.00% of the stated principal amount;
- (ii) repayment of principal if, and only if, the final index level is not less than the initial index level by more than 20%; and
- (iii) exposure to decreases in the level of the underlying index if and to the extent the final index level is less than the initial index level by more than 20%.

If the final index level is less than the initial index level by more than 20%, your payment at maturity will be less, and possibly 80% less, than the stated principal amount of your securities at maturity. All payments on the securities are subject to the credit risk of Citigroup Inc.

The EURO STOXX 50® Index is an equity index composed of 50 component stocks of market sector leaders from within the 19 EURO STOXX® Supersector indices, which represent the Eurozone portion of the STOXX Europe 600® Supersector indices. The STOXX Europe 600® Supersector indices contain the 600 largest stocks traded on the major exchanges of 18 European countries.

The terms of the securities are set forth in this pricing supplement, the accompanying product supplement, underlying supplement and prospectus supplement and prospectus. You should read this pricing supplement together with the accompanying product supplement, underlying supplement and prospectus supplement and prospectus for additional information about the securities. Information included in this pricing supplement supersedes information in the product supplement, underlying supplement, prospectus supplement and prospectus to the extent it is different from that information. The accompanying product supplement, underlying supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect your payment at maturity, such as market disruption events and other events affecting the underlying index. These events and their consequences are described in the accompanying product supplement in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to an Underlying Index—Consequences of a Market Disruption Event; Postponement of a Valuation Date” and “—Discontinuance or Material Modification of an Underlying Index,” and not in this pricing supplement. Certain defined terms used but not defined herein have the meanings set forth in the product supplement. The “Description of the Securities” section of the accompanying product supplement capitalizes the following terms that are defined and used in this pricing supplement, and the disclosures provided in the accompanying product supplement relevant to the securities should be read accordingly: securities; underlying index; pricing date; valuation date; closing level; scheduled trading day; market disruption event; and calculation agent.

You may access the product supplement, underlying supplement or prospectus supplement and prospectus on the SEC website [www.sec.gov](http://www.sec.gov) as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

Investor Considerations

We have designed the securities for investors who:

- i seek 175% leveraged exposure to the positive performance of the underlying index if the final index level is greater than the initial index level, subject to the maximum return at maturity of 40.00% of the stated principal amount;
- i desire to limit the downside exposure to the underlying index through the 20% buffer;
- i understand that if the final index level is less than the initial index level by more than 20%, they will receive less, and possibly 80% less, than the stated principal amount per security at maturity;
- i are willing to forgo interest payments on the securities and dividends that may be paid on the stocks that constitute the underlying index; and
- i are willing to hold the securities until maturity.

The securities are not designed for, and may not be a suitable investment for, investors who:

- i seek a liquid investment or are unable or unwilling to hold the securities to maturity;
- i are unwilling to accept the risk that the underlying index may decrease by more than 20% from its initial index level to its final index level;
- i seek uncapped exposure to the upside performance of the underlying index;
- i seek full return of the stated principal amount of the securities at maturity;
- i seek current income;
- i are unwilling to accept the risk of exposure to the Eurozone equity market;
- i seek exposure to the underlying index but are unwilling to accept the risk/return trade-offs inherent in the payment at maturity for the securities;
- i are unwilling to accept the credit risk of Citigroup Inc. (i) to obtain exposure to the underlying index generally or (ii) to obtain exposure to the underlying index that the securities provide specifically; or
- i prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due January 7, 2019

Terms of the Securities

Underlying Index:	The EURO STOXX 50® Index (ticker symbol: “SX5E”)
Issuer:	Citigroup Inc.
Aggregate Stated Principal Amount:	\$12,717,000
Stated Principal Amount:	\$1,000 per security. References in this pricing supplement to a “security” are to a security with a stated principal amount of \$1,000.
Pricing Date:	March 31, 2015
Issue Date:	April 6, 2015
Valuation Date:	December 28, 2018, subject to postponement if such date is not a scheduled trading day or if certain market disruption events occur
Maturity Date:	January 7, 2019
	For each \$1,000 stated principal amount you hold at maturity:
	<ul style="list-style-type: none"> <li>• If the final index level is greater than the initial index level:</li> </ul>
	\$1,000 plus the lesser of:
	(i) $\$1,000 \times \text{final index level} - \text{initial index level} \times \text{participation rate}$ ; and
	initial index level
	(ii) the maximum return at maturity
Payment at Maturity:	<ul style="list-style-type: none"> <li>• If the final index level is less than or equal to the initial index level, but greater than or equal to the buffer level: \$1,000; or</li> <li>• If the final index level is less than the buffer level:</li> </ul>
	\$1,000 minus:
	$\$1,000 \times \text{buffer level} - \text{final index level}$
	initial index level
	If the final index level is less than the buffer level, you will receive less, and possibly 80% less, than the \$1,000 stated principal amount per security at maturity.
Initial Index Level:	3,697.38 (the closing level of the underlying index on the pricing date)
Final Index Level:	The closing level of the underlying index on the valuation date
Maximum Return at Maturity:	\$400.00 per security (40.00% of the stated principal amount). Because of the maximum return at maturity, the payment at maturity will not exceed \$1,400.00 per security.
Buffer Level:	2,957.904, 80% of the initial index level

Participation Rate:	175%
Calculation Agent:	CGMI
Denominations:	\$1,000 and any integral multiple of \$1,000
CUSIP/ISIN:	1730T06H7 / US1730T06H74

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

### Hypothetical Payout Profile

The diagram below illustrates your payment at maturity for a range of hypothetical percentage changes from the initial index level to the final index level. Your actual return will depend on the actual final index level and whether you hold your securities to maturity.

Investors in the securities will not receive any dividends on the stocks that constitute the underlying index. The diagram below does not show any effect of lost dividend yield over the term of the securities. See “Summary Risk Factors—Investing In The Securities Is Not Equivalent To Investing In The Underlying Index Or The Stocks That Constitute The Underlying Index” below.

Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

Risk Considerations

An investment in the securities is significantly riskier than an investment in conventional debt securities. The securities are subject to all of the risks associated with an investment in our conventional debt securities, including the risk that we may default on our obligations under the securities, and are also subject to risks associated with the underlying index. Accordingly, the securities are suitable only for investors who are capable of understanding the complexities and risks of the securities. You should consult your own financial, tax and legal advisers as to the risks of an investment in the securities and the suitability of the securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the securities. You should read this summary together with the more detailed description of risks relating to an investment in the securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the documents incorporated by reference in the accompanying prospectus, including our most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to our business more generally.

**You May Lose Up To 80% Of Your Investment.**

Unlike conventional debt securities, the securities do not repay a fixed amount of principal at maturity. Instead, your payment at maturity will depend on the performance of the underlying index. If the final index level is less than the buffer level, you will lose 1% of the stated principal amount of your securities for every 1% by which the final index level is less than the buffer level.

**The Securities Do Not Pay Interest.**

Unlike conventional debt securities, the securities do not pay interest or any other amounts prior to maturity. You should not invest in the securities if you seek current income during the term of the securities.

**Your Potential Return On The Securities Is Limited.**

Your potential total return on the securities at maturity is limited to the maximum return at maturity of 40.00%, which is equivalent to a maximum return at maturity of \$400.00 per security. Taking into account the participation rate, any increase in the final index level over the initial index level by more than approximately 22.86% will not increase your return on the securities and will progressively reduce the effective amount of leverage provided by the securities.

**Investing In The Securities Is Not Equivalent To Investing In The Underlying Index Or The Stocks That Constitute The Underlying Index.**

You will not have voting rights, rights to receive any dividends or any other rights with respect to the stocks that constitute the underlying index. As of March 31, 2015, the average dividend yield of the underlying index was approximately 3.22%. While it is impossible to know the future dividend yield of the underlying index, if this average dividend yield were to remain constant for the term of the securities, you would be forgoing an aggregate yield of approximately 12.08% (assuming no reinvestment of dividends) by investing in the securities instead of investing directly in the stocks that constitute the underlying index or in another investment linked to the underlying index that provides for a pass-through of dividends. The payment scenarios described in this pricing supplement do not show any

effect of lost dividend yield over the term of the securities.

Your Payment At Maturity Depends On The Closing Level Of The Underlying Index On A Single Day.

Because your payment at maturity depends on the closing level of the underlying index solely on the valuation date, you are subject to the risk that the closing level of the underlying index on that day may be lower, and possibly significantly lower, than on one or more other dates during the term of the securities. If you had invested in another instrument linked to the underlying index that you could sell for full value at a time selected by you, or if the payment at maturity were based on an average of closing levels of the underlying index, you might have achieved better returns.

The Securities Are Subject To The Credit Risk Of Citigroup Inc.

If we default on our obligations under the securities, you may not receive anything owed to you under the securities.

PS-7

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

The Securities Will Not Be Listed On A Securities Exchange And You May Not Be Able To Sell Them Prior To Maturity.

The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. CGMI currently intends to make a secondary market in relation to the securities and to provide an indicative bid price for the securities on a daily basis. Any indicative bid price for the securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your securities prior to maturity. Accordingly, an investor must be prepared to hold the securities until maturity.

The Estimated Value Of The Securities On The Pricing Date, Based On CGMI's Proprietary Pricing Models And Our Internal Funding Rate, Is Less Than The Public Offering Price.

The difference is attributable to certain costs associated with selling, structuring and hedging the securities that are included in the public offering price. These costs include (1) the selling concessions paid in connection with the offering of the securities, (2) hedging and other costs incurred by us and our affiliates in connection with the offering of the securities and (3) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the securities. These costs adversely affect the economic terms of the securities because, if they were lower, the economic terms of the securities would be more favorable to you. The economic terms of the securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the securities. See "The Estimated Value Of The Securities Would Be Lower If It Were Calculated Based On Our Secondary Market Rate" below.

The Estimated Value Of The Securities Was Determined For Us By Our Affiliate Using Proprietary Pricing Models.

CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of the underlying index, dividend yields on the stocks that constitute the underlying index and interest rates. CGMI's views on these inputs may differ from your or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the securities. Moreover, the estimated value of the securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the securities for other purposes, including for accounting purposes. You should not invest in the securities because of the estimated value of the securities. Instead, you should be willing to hold the securities to maturity irrespective of the initial estimated value.

The Estimated Value Of The Securities Would Be Lower If It Were Calculated Based On Our Secondary Market Rate.

The estimated value of the securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the securities. Our internal funding rate is generally lower than the market rate implied by traded instruments referencing our debt obligations in

the secondary market for those debt obligations, which we refer to as our secondary market rate. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not an interest rate that we will pay to investors in the securities, which do not bear interest.

The Estimated Value Of The Securities Is Not An Indication Of The Price, If Any, At Which CGMI Or Any Other Person May Be Willing To Buy The Securities From You In The Secondary Market.

Any such secondary market price will fluctuate over the term of the securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the securities than if our internal funding rate were used. In addition, any secondary market price for the securities will be reduced by a bid-ask spread, which may vary depending on the aggregate stated principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the securities will be less than the public offering price.

PS-8

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

The Value Of The Securities Prior To Maturity Will Fluctuate Based On Many Unpredictable Factors.

The value of your securities prior to maturity will fluctuate based on the level and volatility of the underlying index and a number of other factors, including the price and volatility of the stocks that constitute the underlying index, the dividend yields on the stocks that constitute the underlying index, interest rates generally, the volatility of the exchange rate between the U.S. dollar and the euro, the correlation between that exchange rate and the level of the underlying index, the time remaining to maturity and our creditworthiness, as reflected in our secondary market rate. You should understand that the value of your securities at any time prior to maturity may be significantly less than the public offering price.

Immediately Following Issuance, Any Secondary Market Bid Price Provided By CGMI, and The Value That Will Be Indicated On Any Brokerage Account Statements Prepared By CGMI Or Its Affiliates, Will Reflect A Temporary Upward Adjustment.

The amount of this temporary upward adjustment will steadily decline to zero over the temporary adjustment period. See “Valuation of the Securities” in this pricing supplement.

The Underlying Index Is Subject To Risks Associated With The Eurozone.

The companies whose stocks constitute the underlying index are leading companies in the Eurozone. A number of countries in the Eurozone are undergoing a financial crisis affecting their economies, their ability to meet their sovereign financial obligations and their financial institutions. Countries in the Eurozone that are not currently experiencing a financial crisis may do so in the future as a result of developments in other Eurozone countries. The economic ramifications of this financial crisis, and its effects on the companies that make up the underlying index, are impossible to predict. This uncertainty may contribute to significant volatility in the underlying index, and adverse developments affecting the Eurozone may affect the underlying index in a way that adversely affects the value of and return on the securities. Furthermore, you should understand that there is generally less publicly available information about non-U.S. companies than about U.S. companies that are subject to the reporting requirements of the SEC, and non-U.S. companies are generally subject to accounting, auditing and financial reporting standards and requirements and securities trading rules that are different from those applicable to U.S. reporting companies.

The Underlying Index Performance Will Not Be Adjusted For Changes In The Exchange Rate Between The Euro And The U.S. Dollar.

The underlying index is composed of stocks traded in Euro, the value of which may be subject to a high degree of fluctuation relative to the U.S. dollar. However, the performance of the underlying index and the value of your securities will not be adjusted for exchange rate fluctuations. If the Euro appreciates relative to the U.S. dollar over the term of the securities, your return on the securities will underperform an alternative investment that offers exposure to that appreciation in addition to the change in the level of the underlying index.

Our Offering Of The Securities Is Not A Recommendation Of The Underlying Index.

The fact that we are offering the securities does not mean that we or Wells Fargo or its affiliates believe that investing in an instrument linked to the underlying index is likely to achieve favorable returns. In fact, as we and Wells Fargo are each part of a global financial institution, our affiliates and affiliates of Wells Fargo may have positions (including

short positions) in the stocks that constitute the underlying index or in instruments related to the underlying index or such stocks and may publish research or express opinions, that in each case are inconsistent with an investment linked to the underlying index. These and other activities of our affiliates or of Wells Fargo or its affiliates may affect the level of the underlying index in a way that has a negative impact on your interests as a holder of the securities.

The Level Of The Underlying Index May Be Adversely Affected By Our Or Our Affiliates', Or By Wells Fargo And Its Affiliates', Hedging And Other Trading Activities.

We have hedged our obligations under the securities through CGMI or other of our affiliates, who have taken positions directly in the stocks that constitute the underlying index and other financial instruments related to the underlying index or such stocks and may adjust such positions during the term of the securities. Our affiliates and Wells Fargo and its affiliates also trade the stocks that constitute the underlying index and other financial instruments related to the underlying index or such stocks on a regular basis (taking long or short positions or both), for their accounts, for other accounts under their management or to facilitate transactions on behalf of customers. These activities could affect the level of the underlying index in a way that negatively affects the value of the securities. They could also result in substantial returns for us or our affiliates or Wells Fargo and its affiliates while the value of the securities declines.

PS-9

---

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

We And Our Affiliates, or Wells Fargo or Its Affiliates, May Have Economic Interests That Are Adverse To Yours As A Result Of Their Respective Business Activities.

Our affiliates or Wells Fargo or its affiliates may currently or from time to time engage in business with the issuers of the stocks that constitute the underlying index, including extending loans to, making equity investments in or providing advisory services to such issuers. In the course of this business, we or our affiliates or Wells Fargo or its affiliates may acquire non-public information about such issuers, which will not be disclosed to you. Moreover, if any of our affiliates or Wells Fargo or any of its affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against any such issuer that are available to them without regard to your interests.

The Calculation Agent, Which Is An Affiliate Of Ours, Will Make Important Determinations With Respect To The Securities.

If certain events occur, such as market disruption events or the discontinuance of the underlying index, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your payment at maturity. In making these judgments, the calculation agent's interests as an affiliate of ours could be adverse to your interests as a holder of the securities.

Adjustments To The Underlying Index May Affect The Value Of Your Securities.

STOXX Limited (the "underlying index publisher") may add, delete or substitute the stocks that constitute the underlying index or make other methodological changes that could affect the level of the underlying index. The underlying index publisher may discontinue or suspend calculation or publication of the underlying index at any time without regard to your interests as holders of the securities.

The U.S. Federal Tax Consequences Of An Investment In The Securities Are Unclear.

There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service (the "IRS"). Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. As described below under "United States Federal Tax Considerations," in 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. You should read carefully the discussion under "United States Federal Tax Considerations" and "Risk Factors Relating to the Securities" in the accompanying product supplement and "United States Federal Tax Considerations" in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

### Hypothetical Returns

The table below is based on a range of hypothetical percentage changes from the initial index level to the final index level and illustrates:

- the hypothetical percentage change from the initial index level to the hypothetical final index level;
- the hypothetical payment at maturity per security;
- the hypothetical total pre-tax rate of return; and
- the hypothetical pre-tax annualized rate of return.

Hypothetical final index level	Hypothetical percentage change from the initial index level to the hypothetical final index level	Hypothetical payment at maturity per security	Hypothetical total pre-tax rate of return	Hypothetical pre-tax annualized rate of return(1)
7,394.760	100.00%	\$1,400.00	40.00%	9.15%
6,470.415	75.00%	\$1,400.00	40.00%	9.15%
5,546.070	50.00%	\$1,400.00	40.00%	9.15%
5,176.332	40.00%	\$1,400.00	40.00%	9.15%
4,806.594	30.00%	\$1,400.00	40.00%	9.15%
4,542.601	22.86%	\$1,400.00	40.00%	9.15%
4,436.856	20.00%	\$1,350.00	35.00%	8.15%
4,067.118	10.00%	\$1,175.00	17.50%	4.34%
3,882.249	5.00%	\$1,087.50	8.75%	2.24%
3,697.380	0.00%	\$1,000.00	0.00%	0.00%
3,512.511	-5.00%	\$1,000.00	0.00%	0.00%
3,327.642	-10.00%	\$1,000.00	0.00%	0.00%
2,957.904	-20.00%	\$1,000.00	0.00%	0.00%
2,920.930	-21.00%	\$990.00	-1.00%	-0.27%
2,588.166	-30.00%	\$900.00	-10.00%	-2.78%
2,218.428	-40.00%	\$800.00	-20.00%	-5.85%
1,848.690	-50.00%	\$700.00	-30.00%	-9.27%
924.345	-75.00%	\$450.00	-55.00%	-20.15%
0.000	-100.00%	\$200.00	-80.00%	-38.54%

(1) The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis.

Hypothetical Payments at Maturity

The examples below are intended to illustrate how your payment at maturity will depend on whether the final index level is greater than or less than the initial index level and by how much.

Example 1—Upside Scenario A. The hypothetical final index level is 4,067.118 (an approximately 10.00% increase from the initial index level), which is greater than the initial index level.

Payment at maturity per security = \$1,000 plus:

$\$1,000 \times \frac{\text{final index level} - \text{initial index level}}{\text{initial index level}} \times \text{participation rate}$ , subject to the maximum return at maturity

$= \$1,000 + (\$1,000 \times \frac{4,067.118 - 3,697.380}{3,697.380} \times \text{participation rate})$ , subject to the maximum return at maturity

$= \$1,000 + (\$1,000 \times 10.00\% \times 175\%)$ , subject to the maximum return at maturity

$= \$1,000 + \$175.00$ , subject to the maximum return at maturity

$= \$1,175.00$

Because the underlying index appreciated from its initial index level to its hypothetical final index level and the leveraged return of \$175.00 per security results in a total return at maturity of 17.50%, which is less than the maximum return at maturity of 40.00%, your payment at maturity in this scenario would be equal to \$1,175.00 per security.

Example 2—Upside Scenario B. The hypothetical final index level is 5,546.070 (an approximately 50.00% increase from the initial index level), which is greater than the initial index level.

Payment at maturity per security = \$1,000 plus:

$\$1,000 \times \frac{\text{final index level} - \text{initial index level}}{\text{initial index level}} \times \text{participation rate}$ , subject to the maximum return at maturity

$= \$1,000 + (\$1,000 \times \frac{5,546.070 - 3,697.380}{3,697.380} \times \text{participation rate})$ , subject to the maximum return at maturity

$= \$1,000 + (\$1,000 \times 50.00\% \times 175\%)$ , subject to the maximum return at maturity

$= \$1,000 + \$875.00$ , subject to the maximum return at maturity

$= \$1,400.00$

Because the underlying index appreciated from its initial index level to its hypothetical final index level and the leveraged return of \$875.00 per security would result in a total return at maturity of 87.50%, which is greater than the maximum return at maturity of 40.00%, your payment at maturity in this scenario would equal the maximum payment at maturity of \$1,400.00 per security. In this scenario, an investment in the securities would underperform a hypothetical alternative investment providing 1-to-1 exposure to the appreciation of the underlying index without a maximum return.

Example 3—Par Scenario. The hypothetical final index level is 3,512.511 (an approximately 5.00% decrease from the initial index level), which is less than the initial index level but greater than the buffer level.

Payment at maturity per security = \$1,000

Because the hypothetical final index level did not decrease from the initial index level by more than the 20.00% buffer, your payment at maturity in this scenario would be equal to the \$1,000 stated principal amount per security.

PS-12

---

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

Example 4—Downside Scenario. The hypothetical final index level is 924.345 (an approximately 75.00% decrease from the initial index level), which is less than the buffer level.

Payment at maturity per security = \$1,000 - (\$1,000 × buffer level – final index level ) = \$1,000 – (\$1,000 × 2,957.904 – 924.345)

initial index	3,697.380
---------------	-----------

= \$1,000 - (\$1,000 × 55.00%)

= \$1,000 - \$550.00

= \$450.00

Because the underlying index decreased from the initial index level to the hypothetical final index level by more than the 20.00% buffer, your payment at maturity in this scenario would reflect 1-to-1 exposure to the negative performance of the underlying index beyond the 20.00% buffer.

#### Information About the Underlying Index

The EURO STOXX 50® Index is composed of 50 component stocks of market sector leaders from within the 19 EURO STOXX® Supersector indices, which represent the Eurozone portion of the STOXX Europe 600® Supersector indices. The STOXX Europe 600® Supersector indices contain the 600 largest stocks traded on the major exchanges of 18 European countries.

STOXX Limited (“STOXX”) and its licensors and CGMI have entered into a non-exclusive license agreement providing for the license to CGMI and its affiliates, in exchange for a fee, of the right to use the EURO STOXX 50® Index, which is owned and published by STOXX, in connection with certain financial instruments, including the securities. For more information, see “Equity Index Descriptions—EURO STOXX 50® Index—License Agreement with STOXX Limited” in the accompanying underlying supplement.

Please refer to the sections “Risk Factors” and “Equity Index Descriptions—EURO STOXX 50® Index” in the accompanying underlying supplement for important disclosures regarding the underlying index, including certain risks that are associated with an investment linked to the underlying index.

Neither we nor any of our affiliates makes any representation to you as to the performance of the underlying index.

#### Historical Information

The graph below shows the closing levels of the underlying index for each day such level was available from January 4, 2010 to March 31, 2015. The table that follows shows the high, low and period end closing levels of the underlying index for each quarter in that same period. We obtained the closing levels and other information below from Bloomberg L.P., without independent verification. You should not take the historical levels of the underlying index as an indication of future performance.

### United States Federal Tax Considerations

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “Summary Risk Factors” in this pricing supplement.

In the opinion of our counsel, Davis Polk & Wardwell LLP, which is based on current market conditions, a security should be treated as a prepaid forward contract for U.S. federal income tax purposes. By purchasing a security, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to this treatment. There is uncertainty regarding this treatment, and the IRS or a court might not agree with it.

Assuming this treatment of the securities is respected and subject to the discussion in “United States Federal Tax Considerations” in the accompanying product supplement, the following U.S. federal income tax consequences should result under current law:

- You should not recognize taxable income over the term of the securities prior to maturity, other than pursuant to a sale or exchange.
- Upon a sale or exchange of a security (including retirement at maturity), you should recognize capital gain or loss equal to the difference between the amount realized and your tax basis in the security. Such gain or loss should be long-term capital gain or loss if you held the security for more than one year.

Under current law, if you are a Non-U.S. Holder (as defined in the accompanying product supplement) of the securities, you generally should not be subject to U.S. federal withholding or income tax in respect of any amount paid to you with respect to the securities, provided that (i) income in respect of the securities is not effectively connected with your conduct of a trade or business in the United States, and (ii) you comply with the applicable certification requirements.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. If withholding tax applies to the securities, we will not be required to pay any additional amounts with respect to amounts so withheld.

You should read the section entitled “United States Federal Tax Considerations” in the accompanying product supplement. The preceding discussion, when read in combination with that section, constitutes the full opinion of

Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of owning and disposing of the securities.

You should also consult your tax adviser regarding all aspects of the U.S. federal income and estate tax consequences of an investment in the securities and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

January 7, 2019

Supplemental Plan of Distribution

Pursuant to the terms of the Global Selling Agency Agreement, dated November 13, 2013, CGMI, acting as principal, will purchase the securities from Citigroup Inc. CGMI, as the lead agent for the offering, has agreed to sell the securities to Wells Fargo, as agent. Wells Fargo will receive an underwriting discount and commission of 2.74% (\$27.40) for each security it sells. Wells Fargo will pay selected dealers, which may include WFA and Wells Fargo Advisors Financial Network, LLC, a fixed selling commission of 1.25% (\$12.50) for each security they sell. In addition to the selling commission allowed to WFA, Wells Fargo will pay \$0.75 per security of the underwriting discount and commission to WFA as a distribution expense fee for each security sold by WFA.

The public offering price of the securities includes the underwriting discount and commission described on the cover page of this pricing supplement and the estimated cost of hedging our obligations under the securities. We have hedged our obligations under the securities through affiliated or unaffiliated counterparties, including affiliates of Wells Fargo. Our cost of hedging will include the projected profit that such counterparties, which may include our affiliates and affiliates of Wells Fargo, expect to realize in consideration for assuming the risks inherent in hedging our obligations under the securities. Because hedging our obligations entails risks and may be influenced by market forces beyond the control of any counterparty, which may include our affiliates and affiliates of Wells Fargo, such hedging may result in a profit that is more or less than expected, or could result in a loss.

This pricing supplement and the accompanying prospectus supplement and prospectus may be used by Wells Fargo or an affiliate of Wells Fargo in connection with offers and sales related to market-making or other transactions in the securities. Wells Fargo or an affiliate of Wells Fargo may act as principal or agent in such transactions. Such sales will be made at prices related to prevailing market prices at the time of sale or otherwise.

No action has been or will be taken by Citigroup Inc., Wells Fargo or any broker-dealer affiliates of any of them that would permit a public offering of the securities or possession or distribution of this pricing supplement or the accompanying prospectus supplement or prospectus in any jurisdiction, other than the United States, where action for that purpose is required. No offers, sales or deliveries of the securities, or distribution of this pricing supplement, the accompanying product supplement, underlying supplement or prospectus supplement and prospectus, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations and will not impose any obligations on Citigroup Inc., Wells Fargo or any broker-dealer affiliates of any of them.

For the following jurisdictions, please note specifically:

Argentina

Citigroup Inc.'s Series G Medium-Term Senior Notes program and the related offer of the securities and the sale of the securities under the terms and conditions provided herein does not constitute a public offering in Argentina. Consequently, no public offering approval has been requested or granted by the Comisión Nacional de Valores, nor has any listing authorization of the securities been requested on any stock market in Argentina.

Brazil

The securities may not be offered or sold to the public in Brazil. Accordingly, this pricing supplement and the accompanying prospectus supplement and prospectus have not been submitted to the Comissão de Valores Mobiliários for approval. Documents relating to this offering may not be supplied to the public as a public offering in Brazil or be used in connection with any offer for subscription or sale to the public in Brazil.

#### Chile

The securities have not been registered with the Superintendencia de Valores y Seguros in Chile and may not be offered or sold publicly in Chile. No offer, sales or deliveries of the securities, or distribution of this pricing supplement or the prospectus supplement and prospectus, may be made in or from Chile except in circumstances that will result in compliance with any applicable Chilean laws and regulations.

#### Mexico

The securities have not been registered with the National Registry of Securities maintained by the Mexican National Banking and Securities Commission and may not be offered or sold publicly in Mexico. This pricing supplement and the accompanying prospectus supplement and prospectus may not be publicly distributed in Mexico.

January 7, 2019

Paraguay

This is a private and personal offering. The securities offered have not been approved by or registered with the National Securities Commission (Comisión Nacional de Valores) and are not part of a public offering as defined by the Paraguayan Securities Law. The information contained herein is for informational and marketing purposes only and should not be taken as an investment advice.

Taiwan

These securities may be made available outside Taiwan for purchase by Taiwan residents outside Taiwan but may not be offered or sold in Taiwan.

### Valuation of the Securities

CGMI calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on proprietary pricing models. CGMI's proprietary pricing models generated an estimated value for the securities by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the securities, which consists of a fixed-income bond (the "bond component") and one or more derivative instruments underlying the economic terms of the securities (the "derivative component"). CGMI calculated the estimated value of the bond component using a discount rate based on our internal funding rate. CGMI calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under "Summary Risk Factors—The Value Of The Securities Prior To Maturity Will Fluctuate Based On Many Unpredictable Factors" in this pricing supplement, but not including our creditworthiness. These inputs may be market-observable or may be based on assumptions made by CGMI in its discretionary judgment.

For a period of approximately three months following issuance of the securities, the price, if any, at which CGMI would be willing to buy the securities from investors, and the value that will be indicated for the securities on any brokerage account statements prepared by CGMI or its affiliates (which value CGMI may also publish through one or more financial information vendors), will reflect a temporary upward adjustment from the price or value that would otherwise be determined. This temporary upward adjustment represents a portion of the hedging profit expected to be realized by CGMI or its affiliates over the term of the securities. The amount of this temporary upward adjustment will decline to zero on a straight-line basis over the three-month temporary adjustment period. However, CGMI is not obligated to buy the securities from investors at any time. See "Summary Risk Factors—The Securities Will Not Be Listed On A Securities Exchange And You May Not Be Able To Sell Them Prior To Maturity."

### Validity of the Securities

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to Citigroup Inc., when the securities offered by this pricing supplement have been executed and issued by Citigroup Inc. and authenticated by the trustee pursuant to the indenture, and delivered against payment therefor, such securities will be valid and binding obligations of Citigroup Inc., enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of

applicable law on the conclusions expressed above. This opinion is given as of the date of this pricing supplement and is limited to the laws of the State of New York, except that such counsel expresses no opinion as to the application of state securities or Blue Sky laws to the securities.

In giving this opinion, Davis Polk & Wardwell LLP has assumed the legal conclusions expressed in the opinion set forth below of Michael J. Tarpley, Associate General Counsel–Capital Markets of Citigroup Inc. In addition, this opinion is subject to the assumptions set forth in the letter of Davis Polk & Wardwell LLP dated November 13, 2013, which has been filed as an exhibit to a Current Report on Form 8-K filed by Citigroup Inc. on November 13, 2013, that the indenture has been duly authorized, executed and delivered by, and is a valid, binding and enforceable agreement of the trustee and that none of the terms of the securities nor the issuance and delivery of the securities, nor the compliance by Citigroup Inc. with the terms of the securities, will result in a violation of any provision of any instrument or agreement then binding upon Citigroup Inc. or any restriction imposed by any court or governmental body having jurisdiction over Citigroup Inc.

Market Linked Securities—Leveraged Upside Participation to a Cap and Fixed  
Percentage Buffered Downside  
Principal at Risk Securities Linked to the EURO STOXX 50® Index Due  
January 7, 2019

In the opinion of Michael J. Tarpley, Associate General Counsel—Capital Markets of Citigroup Inc., (i) the terms of the securities offered by this pricing supplement have been duly established under the indenture and the Board of Directors (or a duly authorized committee thereof) of Citigroup Inc. has duly authorized the issuance and sale of such securities and such authorization has not been modified or rescinded; (ii) Citigroup Inc. is validly existing and in good standing under the laws of the State of Delaware; (iii) the indenture has been duly authorized, executed, and delivered by Citigroup Inc.; and (iv) the execution and delivery of such indenture and of the securities offered by this pricing supplement by Citigroup Inc., and the performance by Citigroup Inc. of its obligations thereunder, are within its corporate powers and do not contravene its certificate of incorporation or bylaws or other constitutive documents. This opinion is given as of the date of this pricing supplement and is limited to the General Corporation Law of the State of Delaware.

Michael J. Tarpley, or other internal attorneys with whom he has consulted, has examined and is familiar with originals, or copies certified or otherwise identified to his satisfaction, of such corporate records of Citigroup Inc., certificates or documents as he has deemed appropriate as a basis for the opinions expressed above. In such examination, he or such persons has assumed the legal capacity of all natural persons, the genuineness of all signatures (other than those of officers of Citigroup Inc.), the authenticity of all documents submitted to him or such persons as originals, the conformity to original documents of all documents submitted to him or such persons as certified or photostatic copies and the authenticity of the originals of such copies.
