The information in this pricing supplement is not complete and may be changed. A registration statement relating to these securities has been filed with the Securities and Exchange Commission. This pricing supplement and the accompanying product supplement, underlying supplement, prospectus supplement and prospectus are not an offer to sell these securities, nor are they soliciting an offer to buy these securities, in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED NOVEMBER 25, 2015

Pricing Supplement No. 2015—CMTNG0767 to Product Supplement No. EA-02-03 dated November 13, 2013, Prospectus Supplement and Prospectus each dated November 13, 2013

Filed Pursuant to Rule 424(b)(2)

Registration Statement No. 333-192302

Dated December , 2015

Citigroup Inc. \$-----Trigger Performance Securities

Linked to Shares of the iShares® MSCI EAFE ETF Due On or About December 31, 2020

Investment Description

The Trigger Performance Securities (the “**Securities**”) are unsecured, unsubordinated debt obligations of Citigroup Inc. (the “**Issuer**”) with a return at maturity linked to the performance of shares of the iShares® MSCI EAFE ETF (the “**ETF**” or the “**Underlying Shares**”) from their Initial Share Price to their Final Share Price. If the Share Return is positive, the Issuer will repay the Stated Principal Amount of the Securities at maturity and pay a return equal to the Share Return multiplied by the Participation Rate of between 173% and 183% (the actual Participation Rate will be determined on the Trade Date). If the Share Return is zero or negative and the Final Share Price is greater than or equal to the Trigger Price, the Issuer will repay the Stated Principal Amount of the Securities at maturity. However, if the Share Return is negative and the Final Share Price is less than the Trigger Price, you will be fully exposed to the negative Share Return and the Issuer will pay you less than the Stated Principal Amount at maturity, resulting in a loss on the Stated Principal Amount to investors that is proportionate to the percentage decline in the price of the Underlying Shares.

Investing in the Securities involves significant risks. You will not receive coupon payments during the 5-year term of the Securities. You may lose a substantial portion or all of your initial investment. You will not receive dividends or other distributions paid on the Underlying Shares or the stocks held by the ETF. The contingent repayment of the Stated Principal Amount applies only if you hold the Securities to maturity. Any payment on the Securities, including any repayment of the Stated Principal Amount provided at maturity, is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you might not receive any amounts owed to you under the Securities and you could lose your entire investment.

Features

q Participation in Positive Share Return — If the Share Return is positive, the Issuer will repay the Stated Principal Amount of the Securities at maturity and pay a return equal to the Share Return multiplied by the Participation Rate. If the Share Return is negative, investors may be exposed to the decline in the Underlying Shares at maturity.

Key Dates¹

Trade Date	December 28, 2015
------------	-------------------

q Downside Exposure with Contingent Repayment of the Stated Principal Amount at Maturity — If the Share Return is zero or negative and the Final Share Price is greater than or equal to the Trigger Price, the Issuer will repay the Stated Principal Amount of the Securities at maturity. However, if the Share Return is negative and the Final Share Price is less than the Trigger Price, the Issuer will pay less than the Stated Principal Amount of the Securities at maturity, resulting in a loss on the Stated Principal Amount to investors that is proportionate to the percentage decline in the price of the Underlying Shares. **The contingent repayment of the Stated Principal Amount applies only if you hold the Securities to maturity. You might lose some or all of your initial investment. Any payment on the Securities is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you might not receive any amounts owed to you under the Securities and you could lose your entire investment.**

Settlement Date December 31, 2015

Final Valuation Date² December 24, 2020

Maturity Date December 31, 2020

¹ Expected

² See page PS-3 for additional details.

NOTICE TO INVESTORS: THE SECURITIES ARE SIGNIFICANTLY RISKIER THAN CONVENTIONAL DEBT SECURITIES. THE ISSUER IS NOT NECESSARILY OBLIGATED TO REPAY YOUR INITIAL INVESTMENT IN THE SECURITIES AT MATURITY, AND THE SECURITIES CAN HAVE THE FULL DOWNSIDE MARKET RISK OF THE UNDERLYING SHARES. THIS MARKET RISK IS IN ADDITION TO THE CREDIT RISK INHERENT IN PURCHASING AN OBLIGATION OF CITIGROUP INC. YOU SHOULD NOT PURCHASE THE SECURITIES IF YOU DO NOT UNDERSTAND OR ARE NOT COMFORTABLE WITH THE SIGNIFICANT RISKS INVOLVED IN INVESTING IN THE SECURITIES. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE AND, ACCORDINGLY, MAY HAVE LIMITED OR NO LIQUIDITY.

YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER “SUMMARY RISK FACTORS” BEGINNING ON PAGE PS-4 OF THIS PRICING SUPPLEMENT AND UNDER “RISK FACTORS RELATING TO THE SECURITIES” BEGINNING ON PAGE EA-6 OF THE ACCOMPANYING PRODUCT SUPPLEMENT BEFORE PURCHASING ANY SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY AFFECT THE VALUE OF, AND THE RETURN ON, YOUR SECURITIES. YOU MAY LOSE SOME OR ALL OF YOUR INITIAL INVESTMENT IN THE SECURITIES.

Security Offering

We are offering Trigger Performance Securities Linked to Shares of the iShares® MSCI EAFE ETF. Any return at maturity will be determined by the performance of the Underlying Shares. The Securities are our unsecured, unsubordinated debt obligations and are offered for a minimum investment of 100 Securities at the issue price described below. The Initial Share Price, Participation Rate and Trigger Price will be set on the Trade Date.

Underlying Shares	Initial Share Price	Participation Rate	Trigger Price	CUSIP/ ISIN
iShares® MSCI EAFE ETF (Ticker: EFA) (the “ETF” or “Underlying Share Issuer”)	\$	173% to 183%	\$, 75% of the Initial Share Price	17323P223 / US17323P2231

See “Additional Terms Specific to the Securities” in this pricing supplement. The Securities will have the terms specified in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the Securities or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense. The Securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

	Issue Price⁽¹⁾	Underwriting Discount⁽²⁾	Proceeds to Issuer
Per Security	\$10.00	\$0.05	\$9.95
Total	\$	\$	\$

Citigroup Inc. currently expects that the estimated value of the Securities on the Trade Date will be at least \$9.200 per Security, which will be less than the issue price. The estimated value of the Securities is based on proprietary pricing models of Citigroup Global Markets Inc. (“CGMI”) and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the Securities from you at any time after issuance. See “Valuation of the Securities” in this pricing supplement.

The underwriting discount is \$0.05 per Security. The agents for this offering are CGMI and UBS Financial Services Inc. (“UBS”). CGMI, acting as principal, expects to purchase from Citigroup Inc., and Citigroup Inc. expects to sell to CGMI, the aggregate Stated Principal Amount of the Securities set forth above for \$9.95 per Security. CGMI expects to sell all of the Securities to an unaffiliated dealer at \$9.95 per Security for further sale to certain fee-based advisory accounts for which UBS is an investment advisor at the issue price of \$10.00 per Security. UBS will not receive a sales commission. For additional information on the distribution of the Securities, see “Supplemental Plan of Distribution” in this pricing supplement. In addition to the underwriting discount, CGMI and its affiliates may profit from expected hedging activity related to this offering, even if the value of the Securities declines. See “Use of Proceeds and Hedging” in the accompanying prospectus.

Citigroup Global Markets Inc. UBS Financial Services Inc.

Additional Terms Specific to the Securities

The terms of the Securities are set forth in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement. The accompanying product supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect your payment at maturity. These events and their consequences are described in the accompanying product supplement in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date,” “—Dilution and Reorganization Adjustments” and “—Delisting, Liquidation or Termination of an ETF,” and not in this pricing supplement. The accompanying underlying supplement contains important disclosures regarding the Underlying Shares that are not repeated in this pricing supplement. It is important that you read the accompanying product supplement, underlying supplement, prospectus supplement and prospectus together with this pricing supplement before you decide whether to invest in the Securities. Certain terms used but not defined in this pricing supplement are defined in the accompanying product supplement.

You may access the accompanying product supplement, underlying supplement, prospectus supplement and prospectus on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for November 13, 2013 on the SEC website):

- .. Product Supplement No. EA-02-03 dated November 13, 2013:
http://www.sec.gov/Archives/edgar/data/831001/000095010313006626/dp41902_424b2-par.htm
- .. Underlying Supplement No. 3 dated November 13, 2013:
http://www.sec.gov/Archives/edgar/data/831001/000095010313006624/dp41866_424b2-us3.htm

You may revoke your offer to purchase the Securities at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase, the Securities prior to the Trade Date. The applicable agent will notify you in the event of any material changes to the terms of the Securities, and you will be asked to accept such changes in connection with your purchase of the Securities. You may also choose to reject such changes, in which case the applicable agent may reject your offer to purchase the Securities.

References to “Citigroup Inc.,” “we,” “our” and “us” refer to Citigroup Inc. and not to any of its subsidiaries. In this pricing supplement, “Securities” refers to the Trigger Performance Securities Linked to Shares of the iShar^{es}MSCI EAFE ETF that are offered hereby, unless the context otherwise requires.

This pricing supplement, together with the documents listed above, contains the terms of the Securities and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. The description in this pricing supplement of the particular terms of the Securities supplements, and, to the extent inconsistent with, replaces, the descriptions of the general terms and provisions of the debt securities set forth in the accompanying product supplement, prospectus supplement and prospectus. You should carefully consider, among other things, the matters set forth in “Summary Risk Factors” in this pricing supplement and “Risk Factors Relating to the Securities” in the accompanying product supplement, as the Securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before deciding to invest in the Securities.

Investor Suitability

The suitability considerations identified below are not exhaustive. Whether or not the Securities are a suitable investment for you will depend on your individual circumstances, and you should reach an investment decision only after you and your investment, legal, tax, accounting and other advisors have carefully considered the suitability of an investment in the Securities in light of your particular circumstances. You should also review “Summary Risk Factors” beginning on page PS-4 of this pricing supplement and “Risk Factors Relating to the Securities” beginning on page EA-6 of the accompanying product supplement.

The Securities may be suitable for you if, among other considerations:

“ You fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.

“ You can tolerate a loss of all or a substantial portion of your initial investment and are willing to make an investment that may have the full downside market risk of an investment in the Underlying Shares or in the stocks held by the ETF.

“ You believe that the price of the Underlying Shares will increase over the term of the Securities.

“ You would be willing to invest in the Securities if the Participation Rate was set equal to the bottom of the range indicated on the cover page hereof (the actual Participation Rate will be set on the Trade Date).

The Securities may *not* be suitable for you if, among other considerations:

“ You do not fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.

“ You require an investment designed to guarantee a full return of the Stated Principal Amount at maturity.

“ You cannot tolerate the loss of all or a substantial portion of your initial investment, and you are not willing to make an investment that may have the full downside market risk of an investment in the Underlying Shares or in the stocks held by the ETF.

“ You believe that the price of the Underlying Shares will decline during the term of the Securities and is likely to close below the Trigger Price on the Final Valuation Date.

- “ You can tolerate fluctuations in the value of the Securities prior to maturity that may be similar to or exceed the downside fluctuations in the price of the Underlying Shares.
- “ You would not be willing to invest in the Securities if the Participation Rate was set equal to the bottom of the range indicated on the cover page hereof (the actual Participation Rate will be set on the Trade Date).
- “ You do not seek current income from your investment and are willing to forgo dividends or any other distributions paid on the Underlying Shares or the stocks held by the ETF for the term of the Securities.
- “ You cannot tolerate fluctuations in the value of the Securities prior to maturity that may be similar to or exceed the downside fluctuations in the price of the Underlying Shares.
- “ You seek an investment with exposure to foreign equity markets.
- “ You seek current income from this investment or prefer to receive the dividends and any other distributions paid on the Underlying Shares or the stocks held by the ETF for the term of the Securities.
- “ You are willing and able to hold the Securities to maturity, and accept that there may be little or no secondary market for the Securities and that any secondary market will depend in large part on the price, if any, at which CGMI is willing to purchase the Securities.
- “ You do not seek an investment with exposure to foreign equity markets.
- “ You are willing to assume the credit risk of Citigroup Inc. for all payments under the Securities, and understand that if Citigroup Inc. defaults on its obligations you might not receive any amounts due to you, including any repayment of the Stated Principal Amount.
- “ You are unwilling or unable to hold the Securities to maturity, or you seek an investment for which there will be an active secondary market.
- “ You are not willing to assume the credit risk of Citigroup Inc. for all payments under the Securities, including any repayment of the Stated Principal Amount.

Indicative Terms

Issuer	Citigroup Inc.
Issue Price	100% of the Stated Principal Amount per Security
Stated Principal Amount	\$10.00 per Security
Term	Approximately 5 years
Trade Date ¹	December 28, 2015
Settlement Date ¹	December 31, 2015
Final Valuation Date ^{1, 2}	December 24, 2020
Maturity Date ¹	December 31, 2020
Underlying Shares	Shares of the iShares® MSCI EAFE ETF (Ticker: EFA) (the “ETF” or the “Underlying Share Issuer”)
Trigger Price	\$, 75% of the Initial Share Price
Participation Rate	173% to 183%. The actual Participation Rate will be determined on the Trade Date. If the Share Return is positive , Citigroup Inc. will pay you a cash payment per \$10.00 Stated Principal Amount of Securities that provides you with the Stated Principal Amount of \$10.00 plus a return equal to the Share Return multiplied by the Participation Rate, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Share Return} \times \text{Participation Rate})$$

If the Share Return is zero or negative and the Final Share Price is greater than or equal to the Trigger Price on the Final Valuation Date, Citigroup Inc. will pay you a cash payment of \$10.00 per \$10.00 Stated Principal Amount of Securities.

Payment at Maturity
(per \$10.00 Stated
Principal Amount of
Securities)

If the Share Return is negative and the Final Share Price is less than the Trigger Price on the Final Valuation Date, Citigroup Inc. will pay you a cash payment at maturity less than the Stated Principal Amount of \$10.00 per Security, resulting in a loss on the Stated Principal Amount that is proportionate to the percentage decline in the price of the Underlying Shares, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Share Return})$$

In this scenario, you will be exposed to the full negative Share Return, and you will lose a substantial portion or all of the Stated Principal Amount in an amount proportionate to the percentage decline in the Underlying Shares.

Share Return

$$\frac{\text{Final Share Price} - \text{Initial Share Price}}{\text{Initial Share Price}}$$

Initial Share Price \$, the closing price of the Underlying Shares on the Trade Date

Final Share Price The closing price of the Underlying Shares on the Final Valuation Date

INVESTING IN THE SECURITIES INVOLVES SIGNIFICANT RISKS. YOU MAY LOSE A SUBSTANTIAL PORTION OR ALL OF YOUR INITIAL INVESTMENT. ANY PAYMENT ON THE SECURITIES, INCLUDING ANY REPAYMENT OF THE STATED PRINCIPAL AMOUNT AT MATURITY, IS SUBJECT TO THE CREDITWORTHINESS OF THE ISSUER. IF CITIGROUP INC. WERE TO DEFAULT ON ITS PAYMENT OBLIGATIONS, YOU MIGHT NOT RECEIVE ANY AMOUNTS OWED TO YOU UNDER THE SECURITIES AND YOU COULD LOSE YOUR ENTIRE INVESTMENT.

Investment Timeline

Trade Date: The closing price of the Underlying Shares (Initial Share Price) is observed, the Participation Rate is set and the Trigger Price is determined.

The Final Share Price is determined on the Final Valuation Date and the Share Return is calculated.

If the Share Return is positive, Citigroup Inc. will pay you a cash payment per \$10.00 Stated Principal Amount of Securities that provides you with the Stated Principal Amount of \$10.00 plus a return equal to the Share Return multiplied by the Participation Rate, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Share Return} \times \text{Participation Rate})$$

If the Share Return is zero or negative and the Final Share Price is greater than or equal to the Trigger Price on the Final Valuation Date, Citigroup Inc. will pay you a cash payment of \$10.00 per \$10.00 Stated Principal Amount of Securities.

Maturity Date:

If the Share Return is negative and the Final Share Price is less than the Trigger Price on the Final Valuation Date, Citigroup Inc. will pay you a cash payment at maturity less than the Stated Principal Amount of \$10.00 per Security, resulting in a loss on the Stated Principal Amount that is proportionate to the percentage decline in the price of the Underlying Shares, calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Share Return})$$

In this scenario, you will be exposed to the full negative Share Return, and you will lose a substantial portion or all of the Stated Principal Amount in an amount proportionate to the percentage decline in the Underlying Shares.

In the event that we make any changes to the expected Trade Date and Settlement Date, the Final Valuation Date and¹ Maturity Date may be changed to ensure that the stated term of the Securities remains the same.

Subject to postponement as described under “Description of the Securities—Certain Additional Terms for Securities²Linked to ETF Shares or Company Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date” in the accompanying product supplement.

PS-3

Summary Risk Factors

An investment in the Securities is significantly riskier than an investment in conventional debt securities. The Securities are subject to all of the risks associated with an investment in our conventional debt securities, including the risk that we may default on our obligations under the Securities, and are also subject to risks associated with the Underlying Shares. Accordingly, the Securities are suitable only for investors who are capable of understanding the complexities and risks of the Securities. You should consult your own financial, tax and legal advisers as to the risks of an investment in the Securities and the suitability of the Securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the Securities. You should read this summary together with the more detailed description of risks relating to an investment in the Securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the documents incorporated by reference in the accompanying prospectus, including our most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to our business more generally.

You may lose some or all of your investment — The Securities differ from ordinary debt securities in that we will not necessarily repay the full Stated Principal Amount of your Securities at maturity. Instead, your return on the Securities is linked to the performance of the Underlying Shares and will depend on whether, and the extent to which, the Share Return is positive or negative. If the Final Share Price is less than the Trigger Price, you will lose 1% of the Stated Principal Amount of the Securities for every 1% by which the Final Share Price is less than the Initial Share Price. There is no minimum payment at maturity on the Securities, and you may lose up to all of your investment in the Securities.

The reduced market risk offered by the Securities is contingent, and you will have full downside exposure to the Underlying Shares if the Final Share Price is less than the Trigger Price — If the Final Share Price is below the Trigger Price, the contingent reduced market risk with respect to a limited range of potential depreciation of the Underlying Shares offered by the Securities will not apply and you will lose 1% of the Stated Principal Amount of the Securities for every 1% by which the Final Share Price is less than the Initial Share Price. The Securities will have full downside exposure to the decline of the Underlying Shares if the Final Share Price is below the Trigger Price. As a result, you may lose your entire investment in the Securities. Further, this contingent reduced market risk applies only if you hold the Securities to maturity. If you are able to sell the Securities prior to maturity you may have to sell them for a loss even if the Underlying Shares have not declined below the Trigger Price.

The Securities do not pay interest — Unlike conventional debt securities, the Securities do not pay interest or any other amounts prior to maturity. You should not invest in the Securities if you seek current income during the term of the Securities.

You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to the Underlying Shares — As of November 23, 2015, the trailing 12-month dividend yield of the Underlying Shares was approximately 2.80%. While it is impossible to know the future dividend yield of the

Underlying Shares, if this trailing 12-month dividend yield were to remain constant for the term of the Securities, you would be forgoing an aggregate yield of approximately 14.00% (assuming no reinvestment of dividends) by investing in the Securities instead of investing directly in the Underlying Shares or in another investment linked to the Underlying Shares that provides for a passthrough of dividends. The payment scenarios described in this pricing supplement do not show any effect of lost dividend yield over the term of the Securities.

Your payment at maturity depends on the closing price of the Underlying Shares on a single day — Because your payment at maturity depends on the closing price of the Underlying Shares solely on the Final Valuation Date, you are subject to the risk that the closing price of the Underlying Shares on that day may be lower, and possibly significantly lower, than on one or more other dates during the term of the Securities. If you had invested directly in the Underlying Shares or in another instrument linked to the Underlying Shares that you could sell for full value at a time selected by you, or if the payment at maturity were based on an average of closing prices of the Underlying Shares, you might have achieved better returns.

The Securities are subject to the credit risk of Citigroup Inc. — Any payment on the Securities will be made by Citigroup Inc. and therefore is subject to the credit risk of Citigroup Inc. If we default on our obligations under the Securities, you may not receive any payments that become due under the Securities. As a result, the value of the Securities prior to maturity will be affected by changes in the market's view of our creditworthiness. Any decline, or anticipated decline, in our credit ratings or increase, or anticipated increase, in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the Securities.

The Securities will not be listed on a securities exchange and you may not be able to sell them prior to maturity — The Securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the Securities. CGMI currently intends to make a secondary market in relation to the Securities and to provide an indicative bid price for the Securities on a daily basis. Any indicative bid price for the Securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the Securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the Securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your Securities prior to maturity. Accordingly, an investor must be prepared to hold the Securities until maturity.

The estimated value of the Securities on the Trade Date, based on CGMI's proprietary pricing models and our internal funding rate, will be less than the issue price — The difference is attributable to certain costs associated with selling, structuring and hedging the Securities that are included in the issue price. These costs include (i) the selling concessions paid in connection with the offering of the Securities, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the Securities and (iii) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the Securities. These costs adversely affect the economic terms of the Securities because, if they were lower, the economic terms of the Securities would be more favorable to you. The economic terms of the Securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the Securities. See "The estimated value of the Securities would be lower if it were calculated based on our secondary market rate" below.

The estimated value of the Securities was determined for us by our affiliate using proprietary pricing models — CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary

pricing models. In doing so, it

PS-4

may have made discretionary judgments about the inputs to its models, such as the volatility of the Underlying Shares, dividend yields on the Underlying Shares and the stocks held by the ETF and interest rates. CGMI's views on these inputs may differ from your or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the Securities. Moreover, the estimated value of the Securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the Securities for other purposes, including for accounting purposes. You should not invest in the Securities because of the estimated value of the Securities. Instead, you should be willing to hold the Securities to maturity irrespective of the initial estimated value.

The estimated value of the Securities would be lower if it were calculated based on our secondary market rate

— The estimated value of the Securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the Securities. Our internal funding rate is generally lower than the market rate implied by traded instruments referencing our debt obligations in the secondary market for those debt obligations, which we refer to as our secondary market rate. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the Securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not an interest rate that we will pay to investors in the Securities, which do not bear interest.

The estimated value of the Securities is not an indication of the price, if any, at which CGMI or any other person may be willing to buy the Securities from you in the secondary market

— Any such secondary market price will fluctuate over the term of the Securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the Securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the Securities than if our internal funding rate were used. In addition, any secondary market price for the Securities will be reduced by a bid-ask spread, which may vary depending on the aggregate Stated Principal Amount of the Securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the Securities will be less than the issue price.

The value of the Securities prior to maturity will fluctuate based on many unpredictable factors

— The value of your Securities prior to maturity will fluctuate based on the price and volatility of the Underlying Shares and a number of other factors, including the price and volatility of the stocks held by the ETF, the dividend yields on the Underlying Shares and the stocks held by the ETF, changes in the exchange rate between the U.S. dollar and each of the currencies in which the stocks held by the ETF trade, interest rates in the United States and in each of the markets of the stocks held by the ETF, the time remaining to maturity and our creditworthiness, as reflected in our secondary market rate. You should understand that the value of your Securities at any time prior to maturity may be significantly less than the issue price. The stated payout from the Issuer, including the potential application of the Participation Rate and the Trigger Price, only applies if you hold the Securities to maturity.

Immediately following issuance, any secondary market bid price provided by CGMI, and the value that will be indicated on any brokerage account statements prepared by CGMI or its affiliates, will reflect a temporary upward adjustment — The amount of this temporary upward adjustment will decline to zero over the temporary

adjustment period. See “Valuation of the Securities” in this pricing supplement.

Our offering of the Securities is not a recommendation of the Underlying Shares — The fact that we are offering the Securities does not mean that we believe that investing in an instrument linked to the Underlying Shares is likely to achieve favorable returns. In fact, as we are part of a global financial institution, our affiliates may have positions (including short positions) in the Underlying Shares or the stocks held by the ETF over the term of the Securities or in instruments related to the Underlying Shares or such stocks over the term of the Securities, and may publish research or express opinions, that in each case are inconsistent with an investment linked to the Underlying Shares. These and other activities of our affiliates may affect the price of the Underlying Shares in a way that has a negative impact on your interests as a holder of the Securities.

Our affiliates, or UBS or its affiliates, may publish research, express opinions or provide recommendations that are inconsistent with investing in or holding the Securities — Any such research, opinions or recommendations could affect the closing price of the Underlying Shares and the value of the Securities. Our affiliates, and UBS and its affiliates, publish research from time to time on financial markets and other matters that may influence the value of the Securities, or express opinions or provide recommendations that may be inconsistent with purchasing or holding the Securities. Any research, opinions or recommendations expressed by our affiliates or by UBS or its affiliates may not be consistent with each other and may be modified from time to time without notice. These and other activities of our affiliates or UBS or its affiliates may adversely affect the price of the Underlying Shares and may have a negative impact on your interests as a holder of the Securities. Investors should make their own independent investigation of the merits of investing in the Securities and the Underlying Shares to which the Securities are linked.

Trading and other transactions by our affiliates, or by UBS or its affiliates, in the equity and equity derivative markets may impair the value of the Securities — We expect to hedge our exposure under the Securities through CGMI or other of our affiliates, who will likely enter into equity and/or equity derivative transactions, such as over-the-counter options or exchange-traded instruments, relating to the Underlying Shares or the stocks held by the ETF and other financial instruments related to the Underlying Shares or such stocks and may adjust such positions during the term of the Securities. It is possible that our affiliates could receive substantial returns from these hedging activities while the value of the Securities declines. Our affiliates and UBS and its affiliates may also engage in trading in instruments linked to the Underlying Shares on a regular basis as part of their respective general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for customers, including block transactions. Such trading and hedging activities may affect the closing price of the Underlying Shares and reduce the return on your investment in the Securities. Our affiliates or UBS or its affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to the Underlying Shares. By introducing competing products into the marketplace in this manner, our affiliates or UBS or its affiliates could adversely affect the value of the Securities. Any of the foregoing activities described in this paragraph may reflect trading strategies that differ from, or are in direct opposition to, investors’ trading and investment strategies relating to the Securities.

Our affiliates, or UBS or its affiliates, may have economic interests that are adverse to yours as a result of their respective business activities — Our affiliates or UBS or its affiliates may currently or from time to time engage in business with the Underlying Share Issuer or the issuers of the stocks held by the ETF, including extending loans to, making equity investments in or providing advisory services to such issuers. In the course of this business, our affiliates or UBS or its affiliates may acquire non-public information about those issuers, which they will not disclose to you. Moreover, if any of our affiliates or UBS or any of its affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against that issuer that are available to them without regard to your interests.

Even if the Underlying Share Issuer pays a dividend that it identifies as special or extraordinary, no adjustment will be required under the Securities for that dividend unless it meets the criteria specified in the accompanying product supplement — In general, an adjustment will not be made under the terms of the Securities for any cash dividend paid on the Underlying Shares unless the amount of the dividend per share, together with any other dividends paid in the same quarter, exceeds the dividend paid per share in the most recent quarter by an amount equal to at least 10% of the closing price of the Underlying Shares on the date of declaration of the dividend. Any dividend will reduce the closing price of the Underlying Shares by the amount of the dividend per share. If the Underlying Share Issuer pays any dividend for which an adjustment is not made under the terms of the Securities, holders of the Securities will be adversely affected. See “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments—Certain Extraordinary Cash Dividends” in the accompanying product supplement.

The Securities may become linked to shares of an issuer other than the original Underlying Share Issuer upon the occurrence of a reorganization event or upon the delisting of the Underlying Shares — For example, if the Underlying Share Issuer enters into a merger agreement that provides for holders of the Underlying Shares to receive shares of another entity, the shares of such other entity will become the Underlying Shares for all purposes of the Securities upon consummation of the merger. Additionally, if the Underlying Shares are delisted or the ETF is otherwise terminated, the calculation agent may, in its sole discretion, select shares of another ETF to be the Underlying Shares. See “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments” and “—Delisting, Liquidation or Termination of an ETF” in the accompanying product supplement.

An adjustment is not required to be made for all events that may have a dilutive effect on or otherwise adversely affect the market price of the Underlying Shares — For example, an adjustment will not be made for ordinary dividends or extraordinary dividends that do not meet the criteria described above. Moreover, the adjustments that are made may not fully offset the dilutive or adverse effect of the particular event. Investors in the Securities may be adversely affected by such an event in a circumstance in which a direct holder of the Underlying Shares would not.

The calculation agent, which is an affiliate of ours, will make important determinations with respect to the Securities — If certain events occur, such as market disruption events, events with respect to the Underlying Share Issuer that may require a dilution adjustment or the delisting of the Underlying Shares, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your payment at maturity. Such judgments could include, among other things:

..

determining whether a market disruption event has occurred;

..if a market disruption event has occurred on the Final Valuation Date, determining whether to postpone the Final Valuation Date;

..determining the price of the Underlying Shares if the price of the Underlying Shares is not otherwise available or a market disruption event has occurred;

determining the appropriate adjustments to be made to the Initial Share Price upon the occurrence of an event described under “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Delisting, Liquidation or Termination of an Underlying ETF” in the accompanying product supplement; and

selecting a successor ETF or performing an alternative calculation of the price of the Underlying Shares if the Underlying Shares are discontinued or materially modified (see “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Delisting, Liquidation or Termination of an Underlying ETF” in the accompanying product supplement).

In making these judgments, the calculation agent’s interests as an affiliate of ours could be adverse to your interests as a holder of the Securities.

The price and performance of the Underlying Shares may not completely track the performance of the ETF’s Underlying Index or the net asset value per share of the Underlying Shares. The ETF does not fully replicate the Underlying Index that it seeks to track and may hold securities different from those included in its Underlying Index. In addition, the performance of the Underlying Shares will reflect additional transaction costs and fees that are not included in the calculation of the MSCI EAFE[®] Index (the “Underlying Index”). All of these factors may lead to a lack of correlation between the performance of the Underlying Shares and the Underlying Index. In addition, corporate actions with respect to the equity securities constituting the Underlying Index or held by the ETF (such as mergers and spin-offs) may impact the variance between the performances of the Underlying Shares and the Underlying Index. Finally, because the Underlying Shares are traded on NYSE Arca, Inc. and are subject to market supply and investor demand, the market value of the Underlying Shares may differ from the net asset value per share of the Underlying Shares.

During periods of market volatility, securities underlying the ETF may be unavailable in the secondary market, market participants may be unable to calculate accurately the net asset value per share of the Underlying Shares and the liquidity of the Underlying Shares may be adversely affected. This kind of market volatility may also disrupt the ability of market participants to create and redeem shares of the ETF. Further, market volatility may adversely affect, sometimes materially, the prices at which market participants are willing to buy and sell the Underlying Shares. As a result, under these circumstances, the market value of the Underlying Shares may vary substantially from the net asset value per share of the Underlying Shares. For all of the foregoing reasons, the performance of the Underlying Shares may not correlate with the performance of the Underlying Index and/or the net asset value per share of the Underlying Shares, which could materially and adversely affect the value of the Securities in the secondary market and/or reduce your payment at maturity.

PS-6

Changes made by the investment adviser to the Underlying Share Issuer or by the sponsor of the index underlying the ETF may adversely affect the Underlying Shares — We are not affiliated with the investment adviser to the Underlying Share Issuer or with the sponsor of the index underlying the ETF. Accordingly, we have no control over any changes such investment adviser or sponsor may make to the Underlying Share Issuer or the index underlying the ETF. Such changes could be made at any time and could adversely affect the performance of the Underlying Shares.

Investing in the Securities exposes investors to risks associated with foreign equity securities — Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Also, there is generally less publicly available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the SEC, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws.

Fluctuations in exchange rates will affect the price of the Underlying Shares — Because the ETF invests in non-U.S. companies and the net asset value of the ETF is based on the U.S. dollar value of the stocks held by the ETF, holders of the Securities will be exposed to currency exchange rate risk with respect to each of the currencies in which such stocks trade. Exchange rate movements for a particular currency are volatile and are the result of numerous factors specific to the relevant country, including the supply of, and the demand for, those currencies, as well as government policy, intervention or actions, but are also influenced significantly from time to time by political or economic developments, and by macroeconomic factors and speculative actions related to each applicable region. An investor's net exposure will depend on the extent to which the currencies of the applicable countries strengthen or weaken against the U.S. dollar and the relative weight of each currency. If, taking into account such weighting, the dollar strengthens against the currencies of the stocks held by the ETF, the price of the Underlying Shares will be adversely affected for that reason alone and the payment at maturity on the Securities may be reduced. Of particular importance to potential currency exchange risk are: existing and expected rates of inflation; existing and expected interest rate levels; the balance of payments; and the extent of governmental surpluses or deficits in the applicable countries and the United States. All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of various component countries and the United States. and other countries important to international trade and finance.

The U.S. federal tax consequences of an investment in the Securities are unclear — There is no direct legal authority regarding the proper U.S. federal tax treatment of the Securities, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the Securities are uncertain, and the IRS or a court might not agree with the treatment of the Securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the Securities, the tax consequences of the ownership and disposition of the Securities might be materially and adversely affected. Even if the treatment of the Securities as prepaid forward contracts is respected, a Security may be treated as a “constructive ownership transaction,” with consequences described below under “United States Federal Tax Considerations.” In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or

other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “United States Federal Tax Considerations” in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the Securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

PS-7

Hypothetical Examples

The diagram below illustrates your hypothetical payment at maturity for a range of hypothetical percentage changes from the Initial Share Price to the Final Share Price. The diagram below is based on a hypothetical Participation Rate of 173%.

Investors in the Securities will not receive any dividends paid on the Underlying Shares or the stocks held by the ETF. The diagram and examples below do not show any effect of lost dividend yield over the term of the Securities. See “Summary Risk Factors— You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to the Underlying Shares” above.

The following table and hypothetical examples below illustrate the Payment at Maturity per \$10.00 Stated Principal Amount of Securities for a hypothetical range of performances for the Underlying Shares from -100.00% to +100.00% and assume an Initial Share Price of \$60.00, a Trigger Price of \$45.00 (75% of the Initial Share Price) and a Participation Rate of 173%. The actual Initial Share Price, Trigger Price and Participation Rate will be determined on the Trade Date. The hypothetical Payment at Maturity examples set forth below are for illustrative purposes only and may not be the actual returns applicable to a purchaser of the Securities. The actual Payment at Maturity will be determined based on the Final Share Price on the Final Valuation Date. You should consider carefully whether the Securities are suitable to your investment goals. The numbers appearing in the table and in the examples below have been rounded for ease of analysis.

Final Share Price	Share Return	Payment at Maturity	Total Return on Securities at Maturity⁽¹⁾
\$120.00	100.00%	\$27.300	173.00%
\$114.00	90.00%	\$25.570	155.70%
\$108.00	80.00%	\$23.840	138.40%
\$102.00	70.00%	\$22.110	121.10%
\$96.00	60.00%	\$20.380	103.80%
\$90.00	50.00%	\$18.650	86.50%
\$84.00	40.00%	\$16.920	69.20%
\$78.00	30.00%	\$15.190	51.90%
\$72.00	20.00%	\$13.460	34.60%
\$66.00	10.00%	\$11.730	17.30%
\$60.00	0.00%	\$10.000	0.00%
\$54.00	-10.00%	\$10.000	0.00%
\$48.00	-20.00%	\$10.000	0.00%
\$45.00	-25.00%	\$10.000	0.00%
\$44.99	-25.01%	\$7.499	-25.01%
\$42.00	-30.00%	\$7.000	-30.00%

Edgar Filing: CITIGROUP INC - Form 424B2

\$36.00	-40.00%	\$6.000	-40.00%
\$30.00	-50.00%	\$5.000	-50.00%
\$24.00	-60.00%	\$4.000	-60.00%
\$18.00	-70.00%	\$3.000	-70.00%
\$12.00	-80.00%	\$2.000	-80.00%
\$6.00	-90.00%	\$1.000	-90.00%
\$0.00	-100.00%	\$0.000	-100.00%

¹ The “Total Return on Securities at Maturity” is calculated as (a) the Payment at Maturity per Security minus the \$10.00 Issue Price per Security *divided by* (b) the \$10.00 Issue Price per Security.

PS-8

Example 1 — The Final Share Price of \$66.00 is greater than the Initial Share Price of \$60.00, resulting in a Share Return of 10.00%. Because the Share Return is 10.00%, Citigroup Inc. would pay you a Payment at Maturity of \$11.73 per \$10.00 Stated Principal Amount of Securities (a total return at maturity of 17.30%), calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Share Return} \times \text{Participation Rate})$$

$$\$10.00 + (\$10.00 \times 10.00\% \times 173\%) = \$11.73$$

Example 2 — The Final Share Price of \$54.00 is less than the Initial Share Price of \$60.00 (resulting in a Share Return of -10.00%) but greater than the Trigger Price of \$45.00. Because the Share Return is negative and the Final Share Price is greater than the Trigger Price, Citigroup Inc. will pay you a Payment at Maturity of \$10.00 per \$10.00 Stated Principal Amount of Securities (a total return at maturity of 0.00%).

Example 3 — The Final Share Price of \$18.00 is less than the Initial Share Price of \$60.00 (resulting in a Share Return of -70.00%) and less than the Trigger Price of \$45.00. Because the Share Return is negative and the Final Share Price is less than the Trigger Price, Citigroup Inc. will pay you a Payment at Maturity of \$3.00 per \$10.00 Stated Principal Amount of Securities (a total return at maturity of -70.00%), calculated as follows:

$$\$10.00 + (\$10.00 \times \text{Share Return})$$

$$\$10.00 + (\$10.00 \times -70.00\%) = \$3.00$$

If the Final Share Price is less than the Trigger Price, you will be fully exposed to the negative Share Return, resulting in a loss on the Stated Principal Amount that is proportionate to the percentage decline in the price of the Underlying Shares. Under these circumstances, you will lose a significant portion or all of the Stated Principal Amount at maturity. Any payment on the Securities, including any repayment of the Stated Principal Amount at maturity, is subject to the creditworthiness of the Issuer and if the Issuer were to default on its payment obligations, you could lose your entire investment.

* The total return at maturity is calculated as (a) the Payment at Maturity per Security minus the \$10.00 Issue Price per Security *divided by* (b) the \$10.00 Issue Price per Security.

The iShares® MSCI EAFE ETF

The iShares® MSCI EAFE ETF (the “**ETF**” or the “**Underlying Share Issuer**”) is an exchange-traded fund that seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in certain developed markets, excluding the United States and Canada, as measured by the MSCI EAFE® Index. However, for purposes of the Securities, the performance of the iShares® MSCI EAFE ETF will reflect only its price performance, as any dividends paid on the shares of the iShares® MSCI EAFE ETF will not be factored into a determination of the Final Share Price of the iShares® MSCI EAFE ETF. The MSCI EAFE® Index was developed by MSCI Inc. as an equity benchmark for international stock performance, and is designed to measure equity market performance in certain developed markets, excluding the United States and Canada.

We have derived all information contained in this pricing supplement regarding the ETF from publicly available information. We have not independently verified such information. Such information reflects the policies of, and is subject to change by, iShares® Inc.

The iShares® MSCI EAFE ETF is an investment portfolio managed by iShares® Inc. BlackRock Fund Advisors is the investment adviser to the iShares® MSCI EAFE ETF. iShares®, Inc. is a registered investment company that consists of numerous separate investment portfolios, including the iShares® MSCI EAFE ETF. Information provided to or filed with the SEC by iShares®, Inc. pursuant to the Securities Act of 1933, as amended, and the Investment Company Act of 1940, as amended, can be located by reference to SEC file numbers 333-92935 and 811-09729, respectively, through the SEC’s website at <http://www.sec.gov>. In addition, information may be obtained from other sources including, but not limited to, press releases, newspaper articles and other publicly disseminated documents. The iShares® MSCI EAFE ETF trades on the NYSE Arca under the ticker symbol “EFA.”

Please refer to the section “Fund Descriptions—iShares® MSCI EAFE ETF” in the accompanying underlying supplement for important disclosures regarding the iShares® MSCI EAFE ETF.

The following table sets forth, for each of the quarterly periods indicated, the high and low closing prices of, and dividends paid, on the Underlying Shares from January 2, 2008 through November 23, 2015. The closing price of the Underlying Shares on November 23, 2015 was \$60.54. The actual Initial Share Price will be the closing price of the Underlying Shares on the Trade Date. We obtained the closing prices and other information below from Bloomberg, L.P., without independent verification. The closing prices and this other information may be adjusted by Bloomberg, L.P. for corporate actions such as stock splits, public offerings, mergers and acquisitions, spin-offs, delistings and bankruptcy. Since its inception, the price of the Underlying Shares has experienced significant fluctuations. The historical performance of the Underlying Shares should not be taken as an indication of future performance, and no assurance can be given as to the closing prices of the Underlying Shares during the term of the Securities. We cannot give you assurance that the performance of the Underlying Shares will result in the return of any of your initial investment. We make no representation as to the amount of dividends, if any, that the Underlying Shares will pay in the future. In any event, as an investor in the Securities, you will not be entitled to receive dividends, if any, that may be payable on the Underlying Shares.

Quarter Begin	Quarter End	Quarterly High	Quarterly Low	Dividends
1/2/2008	3/31/2008	\$78.35	\$68.31	\$0.000
4/1/2008	6/30/2008	\$78.52	\$68.10	\$1.308
7/1/2008	9/30/2008	\$68.04	\$53.08	\$0.000
10/1/2008	12/31/2008	\$55.88	\$35.71	\$0.541
1/2/2009	3/31/2009	\$45.44	\$31.69	\$0.000
4/1/2009	6/30/2009	\$49.04	\$38.57	\$0.945
7/1/2009	9/30/2009	\$55.81	\$43.91	\$0.000
10/1/2009	12/31/2009	\$57.28	\$52.66	\$0.496
1/4/2010	3/31/2010	\$57.96	\$50.45	\$0.000
4/1/2010	6/30/2010	\$58.03	\$46.29	\$0.859
7/1/2010	9/30/2010	\$55.42	\$47.09	\$0.000
10/1/2010	12/31/2010	\$59.46	\$54.25	\$0.538
1/3/2011	3/31/2011	\$61.91	\$55.31	\$0.000
4/1/2011	6/30/2011	\$63.87	\$57.10	\$1.141
7/1/2011	9/30/2011	\$60.80	\$46.66	\$0.000
10/3/2011	12/30/2011	\$55.57	\$46.45	\$0.569
1/3/2012	3/30/2012	\$55.80	\$49.15	\$0.000
4/2/2012	6/29/2012	\$55.51	\$46.55	\$1.149
7/2/2012	9/28/2012	\$55.15	\$47.62	\$0.000
10/1/2012	12/31/2012	\$56.88	\$51.96	\$0.610
1/2/2013	3/28/2013	\$59.89	\$56.90	\$0.000
4/1/2013	6/28/2013	\$63.53	\$57.03	\$0.000
7/1/2013	9/30/2013	\$65.05	\$57.55	\$1.152
10/1/2013	12/31/2013	\$67.06	\$62.71	\$0.552
1/2/2014	3/31/2014	\$68.03	\$62.31	\$0.000
4/1/2014	6/30/2014	\$70.67	\$66.26	\$0.000
7/1/2014	9/30/2014	\$69.25	\$64.12	\$1.676
10/1/2014	12/31/2014	\$64.51	\$59.53	\$0.585
1/02/2015	3/31/2015	\$65.99	\$58.48	\$0.000
4/01/2015	6/30/2015	\$68.42	\$63.49	\$0.000
7/01/2015	9/30/2015	\$65.46	\$56.25	\$1.111
10/01/2015	11/23/2015*	\$62.06	\$57.50	\$0.000

* As of the date of this pricing supplement, available information for the fourth calendar quarter of 2015 includes data for the period from October 1, 2015 through November 23, 2015. Accordingly, the “Quarterly High,” “Quarterly Low” and “Close” data indicated are for this shortened period only and do not reflect complete data for the fourth calendar quarter of 2015.

The graph below illustrates the performance of the Underlying Shares from January 2, 2008 to November 23, 2015. The closing price of the Underlying Shares on November 23, 2015 was \$60.54. We obtained the closing prices of the Underlying Shares from Bloomberg, and we have not participated in the preparation of or verified such information. The historical closing prices of the Underlying Shares should not be taken as an indication of future performance and no assurance can be given as to the Final Share Price or any future closing price of the Underlying Shares. We cannot give you assurance that the performance of the Underlying Shares will result in a positive return on your initial investment and you could lose a significant portion or all of the Stated Principal

Amount at maturity.

PS-10

United States Federal Tax Considerations

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “Summary Risk Factors” in this pricing supplement.

In the opinion of our counsel, Davis Polk & Wardwell LLP, which is based on current market conditions, a Security should be treated as a prepaid forward contract for U.S. federal income tax purposes. By purchasing a Security, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to this treatment. There is uncertainty regarding this treatment, and the IRS or a court might not agree with it.

Assuming this treatment of the Securities is respected and subject to the discussion in “United States Federal Tax Considerations” in the accompanying product supplement, the following U.S. federal income tax consequences should result under current law:

.. You should not recognize taxable income over the term of the Securities prior to maturity, other than pursuant to a sale or exchange.

Upon a sale or exchange of a Security (including retirement at maturity), you should recognize gain or loss equal to the difference between the amount realized and your tax basis in the Security. Subject to the discussion below concerning the potential application of the “constructive ownership” rules under Section 1260 of the Internal Revenue Code of 1986, as amended (the “Code”), any gain or loss recognized upon a sale, exchange or retirement of a Security should be long-term capital gain or loss if you held the Security for more than one year.

Even if the treatment of the Securities as prepaid forward contracts is respected, your purchase of a Security may be treated as entry into a “constructive ownership transaction,” within the meaning of Section 1260 of the Code, with respect to the Underlying Shares. In that case, all or a portion of any long-term capital gain you would otherwise recognize in respect of your Securities would be recharacterized as ordinary income to the extent such gain exceeded the “net underlying long-term capital gain.” Although the matter is unclear, the “net underlying long-term capital gain” may equal the amount of long-term capital gain you would have realized if on the issue date you had purchased Underlying Shares with a value equal to the amount you paid to acquire your Securities and subsequently sold those shares for their fair market value at the time your Securities are sold, exchanged or retired (which would reflect the percentage increase, without regard to the leverage factor, in the value of the Underlying Shares over the term of the Securities). Alternatively, the “net underlying long-term capital gain” could be calculated using a number of Underlying Shares that reflects the leverage factor used to calculate the payment that you will receive on your Securities. Any long-term capital gain recharacterized as ordinary income under Section 1260 would be treated as accruing at a constant rate over the period you held your Securities, and you would be subject to an interest charge in respect of the deemed tax liability on the income treated as accruing in prior tax years. Due to the lack of governing authority under Section 1260, our counsel is not able to opine as to whether or how Section 1260 applies to the Securities. You should read the section entitled “United States Federal Tax Considerations—Tax Consequences to U.S. Holders—Potential

Application of Section 1260 of the Code” in the accompanying product supplement for additional information and consult your tax adviser regarding the potential application of the “constructive ownership” rule.

Subject to the discussion below, if you are a Non-U.S. Holder (as defined in the accompanying product supplement) of the Securities, you generally should not be subject to U.S. federal withholding or income tax in respect of any amount paid to you with respect to the Securities, provided that (i) income in respect of the Securities is not effectively connected with your conduct of a trade or business in the United States, and (ii) you comply with the applicable certification requirements.

The U.S. Treasury Department recently finalized the regulations referred to in “United States Federal Tax Considerations—Tax Consequences to Non-U.S. Holders—Possible Application of Section 871(m) of the Code” in the accompanying product supplement, which require withholding on certain “dividend equivalent” payments to non-U.S. persons. Based on the effective date in the final regulations, those

PS-11

regulations will not apply to the Securities assuming there is no significant modification to the Securities' terms that results in a deemed exchange of the securities for U.S. federal income tax purposes.

As discussed in the section of the accompanying product supplement entitled "United States Federal Tax Considerations," withholding under legislation commonly referred to as "FATCA" might (if the Securities were recharacterized as debt instruments) apply to amounts treated as interest paid with respect to the Securities and to the payment of gross proceeds of a disposition (including a retirement) of the Securities. However, under a recent IRS notice, withholding under "FATCA" will apply to payments of gross proceeds (other than any amount treated as interest) only with respect to dispositions after December 31, 2018. You should consult your tax adviser regarding the potential application of "FATCA" to the Securities.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the "constructive ownership" regime described above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. If withholding tax applies to the Securities, we will not be required to pay any additional amounts with respect to amounts so withheld.

You should read the section entitled "United States Federal Tax Considerations" in the accompanying product supplement. The preceding discussion, when read in combination with that section, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of owning and disposing of the Securities.

You should also consult your tax adviser regarding all aspects of the U.S. federal income and estate tax consequences of an investment in the Securities and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

The agents for this offering are CGMI and UBS. CGMI, an affiliate of Citigroup Inc. and the lead agent for the sale of the Securities, will receive an underwriting discount of \$0.05 for each Security sold in this offering. CGMI, acting as principal, expects to purchase from Citigroup Inc., and Citigroup Inc. expects to sell to CGMI, all of the Securities sold in this offering for \$9.95 per Security. CGMI expects to sell all of the Securities to an unaffiliated dealer at \$9.95 per Security for further sale to certain fee-based advisory accounts for which UBS is an investment advisor at the issue price of \$10.00 per Security. UBS will not receive a sales commission. Investors that purchase and hold the Securities in fee-based advisory accounts will pay advisory fees to UBS based on the amount of assets held in those accounts. If all of the Securities are not sold at the initial offering price, CGMI may change the public offering price and other selling terms.

CGMI is an affiliate of ours. Accordingly, this offering will conform with the requirements addressing conflicts of interest when distributing the securities of an affiliate set forth in Rule 5121 of the Financial Industry Regulatory Authority. Client accounts over which Citigroup Inc. or its subsidiaries have investment discretion will not be permitted to purchase the Securities, either directly or indirectly, without the prior written consent of the client.

See “Plan of Distribution; Conflicts of Interest” in the accompanying product supplement and “Plan of Distribution” in each of the accompanying prospectus supplement and prospectus for additional information.

A portion of the net proceeds from the sale of the Securities will be used to hedge our obligations under the Securities. We expect to hedge our obligations under the Securities through CGMI or other of our affiliates. CGMI or such other affiliates may profit from such expected hedging activity even if the value of the Securities declines. This hedging activity could affect the closing price of the Underlying Shares and, therefore, the value of and your return on the Securities. For additional information on the ways in which our counterparties may hedge our obligations under the Securities, see “Use of Proceeds and Hedging” in the accompanying prospectus.

Valuation of the Securities

CGMI calculated the estimated value of the Securities set forth on the cover page of this pricing supplement based on proprietary pricing models. CGMI’s proprietary pricing models generated an estimated value for the Securities by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the Securities, which consists of a fixed-income bond (the “**bond component**”) and one or more derivative instruments underlying the economic terms of the Securities (the “**derivative component**”). CGMI calculated the estimated value of the bond component using a discount rate based on our internal funding rate. CGMI calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under “Summary Risk Factors—The value of the Securities prior to maturity will fluctuate based on many unpredictable factors” in this pricing supplement, but not including our creditworthiness. These inputs may be market-observable or may be based on assumptions made by CGMI in its discretionary judgment.

The estimated value of the Securities is a function of the terms of the Securities and the inputs to CGMI’s proprietary pricing models. As of the date of this preliminary pricing supplement, it is uncertain what the estimated value of the Securities will be on the Trade Date because certain terms of the Securities have not yet been fixed and because it is

uncertain what the values of the inputs to CGMI's proprietary pricing models will be on the Trade Date.

During a temporary adjustment period immediately following issuance of the Securities, the price, if any, at which CGMI would be willing to buy the Securities from investors, and the value that will be indicated for the Securities on any brokerage account statements prepared by CGMI or its affiliates (which value CGMI may also publish through one or more financial information vendors), will reflect a temporary upward adjustment from the price or value that would otherwise be determined. This temporary upward adjustment represents a portion of the hedging profit expected to be realized by CGMI or its affiliates over the term of the Securities. The amount of this temporary upward

PS-12

adjustment will decline to zero over the temporary adjustment period. CGMI currently expects that the temporary adjustment period will be approximately six months, but the actual length of the temporary adjustment period may be shortened due to various factors, such as the volume of secondary market purchases of the Securities and other factors that cannot be predicted. However, CGMI is not obligated to buy the Securities from investors at any time. See “Summary Risk Factors—The Securities will not be listed on a securities exchange and you may not be able to sell them prior to maturity.”
